## SPRINGS

Spring Water From Australia

## BOTTLED WATER QUALITY REPORT

Gilderoy Springs Pty Ltd | 25 Howells Road, Gilderoy Victoria 3797, Australia

### INTRODUCTION

Gilderoy Springs is a premium quality product, which meets Australia's bottled water standards for quality and safety as tested by the National Measurement Institute (Australian Government – Department of Industry, Innovation & Science).

### GILDEROY SPRINGS SOURCE

Gilderoy Springs water is sourced within a cool climate region of Victoria, Australia. With a sustainable annual rainfall over a pristine rainforest catchment, the natural springs and aquifers create some of the purest drinking water in the world. Our water is sourced from the one location, which provides traceability and consistency of product.

### QUALITY

Purity of water is defined in part by the mineral content and is referred to as Total Dissolved Solids (TDS). TDS is directly related to the purity of water. The higher the TDS level in the water, the greater the probability of harmful contaminants that can pose health risks or hinder the absorption of water molecules on the cellular level.

The World Health Organisation (WHO) classify drinking water with a TDS of up to 300 mg/litre as good quality and 300 – 600 mg/litre as fair.

The Fine Water Society defines a waters subtle taste with the following TDS scale:

Super Low	0 – 50 mg/litre
Low	50 – 250 mg/litre
Medium	250 – 800 mg/litre
High	800 – 1,500 mg/litre

**Gilderoy Springs' TDS is 37 which provides a bottled water of exceptional purity.**

Our TDS levels are extremely low in comparison to other leading bottled waters. Gilderoy Springs' low TDS combined with a neutral pH of 6.5 provides a pure, fresh and subtle taste.

### TYPICAL MINERAL ANALYSIS

Calcium	3 mg/l	Sulfate	3 mg/l
Chloride	13 mg/l	Total Dissolved Solids	37 mg/l
Fluoride	0.2 mg/l	pH	6.5
Magnesium	1 mg/l		
Sodium	7 mg/l
